

Dermatology

Berkeley Outpatient Center

Overview

Encompassing both medical and cosmetic dermatology, our experts at the Berkeley Outpatient Center offer a full range of diagnostic, treatment and surgical services for patients with cutaneous conditions.

Surgical Dermatology

- **Fellowship-trained expertise in Mohs micrographic surgery** for treatment of skin cancers including basal cell carcinomas and squamous cell carcinomas, as well as treatment of melanoma in situ with MART-1 staining
- **Close coordination** with Plastic Surgery at the Berkeley Outpatient Center, allowing for streamlined treatment for related procedures in one location
- **Outpatient surgery** for removal of benign skin growths and skin cancers
